

Session: Bulk Materials Handling
Tuesday, Sept. 23
8-10am
Room N255, Las Vegas Convention Center, Upper Concourse

Title: Leading Edge Conveyor Technologies

Presenter: Greg Biere, Global Manager, Project Sales, Martin Engineering

Abstract:

This session will look at the application of new generation conveyor technologies, including engineered flow chutes, and air-supported belt conveyors in bulk material handling operations at mine and process operations. The paper will discuss benefits including improved control of fugitive material and improved operating efficiency and examples of recent installations.
